Ron Bachar

FRONTEND WEB DEVELOPER | JUNIOR

A diligent and organized web developer with six months of hands-on coding experience, I am committed to producing efficient and reusable code while consistently strive to uphold industry's best coding practices. I possess a good debugging and problem-solving abilities and excel in communication and customer relations. Looking for my next challenge and collaborative team to grow and thrive with.

Professional Experience:

Junior Angular Developer | [Full-time Freelance](#) | Jul 2023 - Present

- ❖ As a Junior Angular Developer in my current role, I actively involved in the development of web applications using Angular framework.
- ❖ Collaborating with the project team to understand requirements and objectives.
- ❖ Implementing Angular components, services, and modules to create interactive and responsive web pages.
- ❖ Used Git and version control for collaboration with team members.
- ❖ Utilizing Figma for UI designs.

Sales Manager | [Active Tech](#) | Aug 2020 | 2 Years

- ❖ I led a high-performing sales team that consistently surpassed sales targets.
- ❖ Managed daily team operations, conducting performance reviews, organizing team meetings, providing coaching sessions, and handling recruitment activities.
- ❖ This role provided a valuable opportunity to develop and apply my sales and leadership skills, drive revenue growth, and successfully guide a team towards achieving sales objectives.

Projects:

Safesure Insurance Compare System | [Angular.ts](#) | Sass

Developed a comprehensive insurance comparison system using Angular and Sass. This project involved creating an intuitive user interface, managing data efficiently, and ensuring a smooth user experience for insurance seekers.

My site app | [React.js](#) | [Tailwind](#)

Designed and built my portfolio page using React.js and Tailwind CSS. This web application showcased my proficiency in creating responsive and visually appealing websites, offering an engaging user experience.
